DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, drawn to a polymeric article, classified in class 428, subclass 421.
 - II. Claims 12-20, drawn to an extrusion process, classified in class 264, subclass xxx.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the invention as claimed can be made by a materially different process such as co-extruding the two layers as melts or laminating two preformed layers under heat and/or pressure.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. This application contains claims directed to the following patentably distinct species of the claimed invention: **(a)** a substrate comprising about 70 to 90 parts by weight of a polyolefin, 2.0 to 16 parts by weight of a maleic anhydride-olefin copolymer, and 2.0 to 12 parts by weight of a polyamide; and **(b)** a substrate comprising about 5 to 15 parts by weight of thermoplastic polyurethanes, 40 to 60 parts by weight of isoprene-styrene copolymers, 0.0 to 2.0 parts by

Art Unit: 1773

weight of phenolic resins, 20 to 40 parts by weight of polyolefin, 2 to 20 parts by weight of polyamide, and 2.0 to 16 parts by weight of maleic anhydride-olefin copolymer.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
